

Science, Expertise & Exclusivity

When science meets experience.

ALL SKIN | MED is a medical-grade skin, hair and scalp range with unique, clinically-proven formulations that have been designed by Cantabria Lab, the founders of Heliocare and experts in dermatology.

Available exclusively from medical-led professional skin clinics, the range is designed to work in partnership with clinical treatments, with the products clinically proven to enhance treatment results & reduce downtime.

Backed by science, ALLSKIN | MED centers around patented, innovative technologies, along with the most in-demand ingredients in dermatology to deliver significant, transformative results.

ALLSKIN | MED
WHEN SCIENCE MEETS EXPERIENCE

Who are Cantabria Labs?

- A global player in 85 countries worldwide.
- No.1 dermocosmetic/dermatological skincare brand prescribed by dermatologists in Spain, Italy, Portugal.
- Pharmaceutical expertise and commitment to quality and proven efficacy.
- Innovative research, science and proven skin enhancement

Established in 1989, Cantabria Labs have earned global recognition for their contribution to the world of dermatology. They specialise in developing innovative, patented ingredients by harnessing the power of nature and repurposing it to improve or protect the skin.

Rigorous research, development and clinical study is the foundation for every product. Working with renowned dermatologists worldwide, Cantabria Labs bring together leading scientific innovation with expertise and the highest quality standards to bring you the future of skincare.

Taking care of our planet

Cantabria Labs are dedicated to caring for and conserving the environment.

La Concha, an environmentally sustainable production centre based in Northern Spain, leverages the power of a geothermal spring to produce renewable energy for the laboratories and provide mineral-rich, medicinal water. They are committed to reducing single-use plastics and minimising their impact on the environment, and the La Concha facility does just that.

The ALLSKIN | MED Commitment to Sustainability:

- No internal leaflets: All product information is accessible online via QR codes, reducing paper waste.
- Optimised product sizing: Larger formats mean less packaging material is needed overall.
- Responsible packaging:
- 90% of our packaging consists of glass bottles, designed for easy separation from pumps—streamlining the recycling process.
- All boxes are FSC® certified and made from 100% recyclable materials.

As a brand, we are constantly striving to do more. We are dedicated to evolving our practices, minimising environmental impact, and eliminating single-use plastics wherever possible.

Medical-Grade Skincare Designed to Enhance Aesthetic Treatments

Designed to work in partnership with clinical treatments, with clinically proven products that enhance treatment results and help reduce downtime.

Driven by Patented Technologies and Evidence-Based Ingredients What truly sets ALLSKIN | MED apart are formulations powered by patented technologies and evidence-based dermatological ingredients, designed to work synergistically to regenerate, protect and optimise skin health before, during and after medical aesthetic procedures.

How ALLSKIN | MED supports in-clinic treatments:

In-clinic immediately post-procedure

Clinically proven repair and regeneration to soothe, calm and support skin recovery at a cellular level, helping reduce redness, swelling and discomfort following medical aesthetic ablative and non-ablative regenerative treatments.

Treatment Plans

Pre- and post-procedure plans for at-home use that support skin readiness for treatment and skin health throughout the treatment journey, helping enhance treatment results and patient comfort.

Prescriptive medical-grade skincare regimes

Prescriptive, targeted regimes formulated with advanced dermatological ingredients including retinoids, growth factors, AHAs and barrier-repair actives, designed to optimise treatment outcomes and support skin readiness for treatment.

At the heart of the range are the ALLSKIN | MED core technologies, paired with innovative delivery systems and high-quality actives to enable ingredient stability, improved tolerance and targeted penetration.

SCA® Pro Growth Factor Technology

SCA® PRO is a clinically proven, patented technology derived from *Cryptomphalus aspersa* secretion, microencapsulated for targeted delivery and optimal skin performance. Rich in proteins with growth factor-like activity, antioxidants, and GAGs, it regenerates to visibly improve firmness, elasticity, and texture.

SCA® PRO is clinically proven to:

- Reduce wrinkle depth and significantly increase skin firmness and elasticity
- Reduce post-procedure side effects such as redness and burning
- Accelerates skin healing
- Improve treatment outcomes (wrinkles, elasticity and facial contour)
- Promote fibroblast proliferation and migration
- Promote collagen synthesis

REOXDERM®

An advanced antioxidant technology for total skin defence.

Reoxderm® is an innovative, patented antioxidant complex exclusive to ALLSKIN | MED. This next-generation technology delivers robust protection against oxidative stress, supports skin repair, and restores balance to the skin's natural processes, making it a powerful tool in the fight against environmental damage and premature ageing.

Powered by a unique blend of scientifically selected active ingredients, Reoxderm® offers comprehensive skin support;

- Neutralises oxidative stress to protect skin from daily environmental aggressors
- Accelerates skin repair and supports cellular regeneration
- Reduces inflammation and soothes sensitive or stressed skin
- Strengthens the skin barrier by restoring microbiome balance
- Promotes healthier, more resilient skin with long-term antioxidant defence

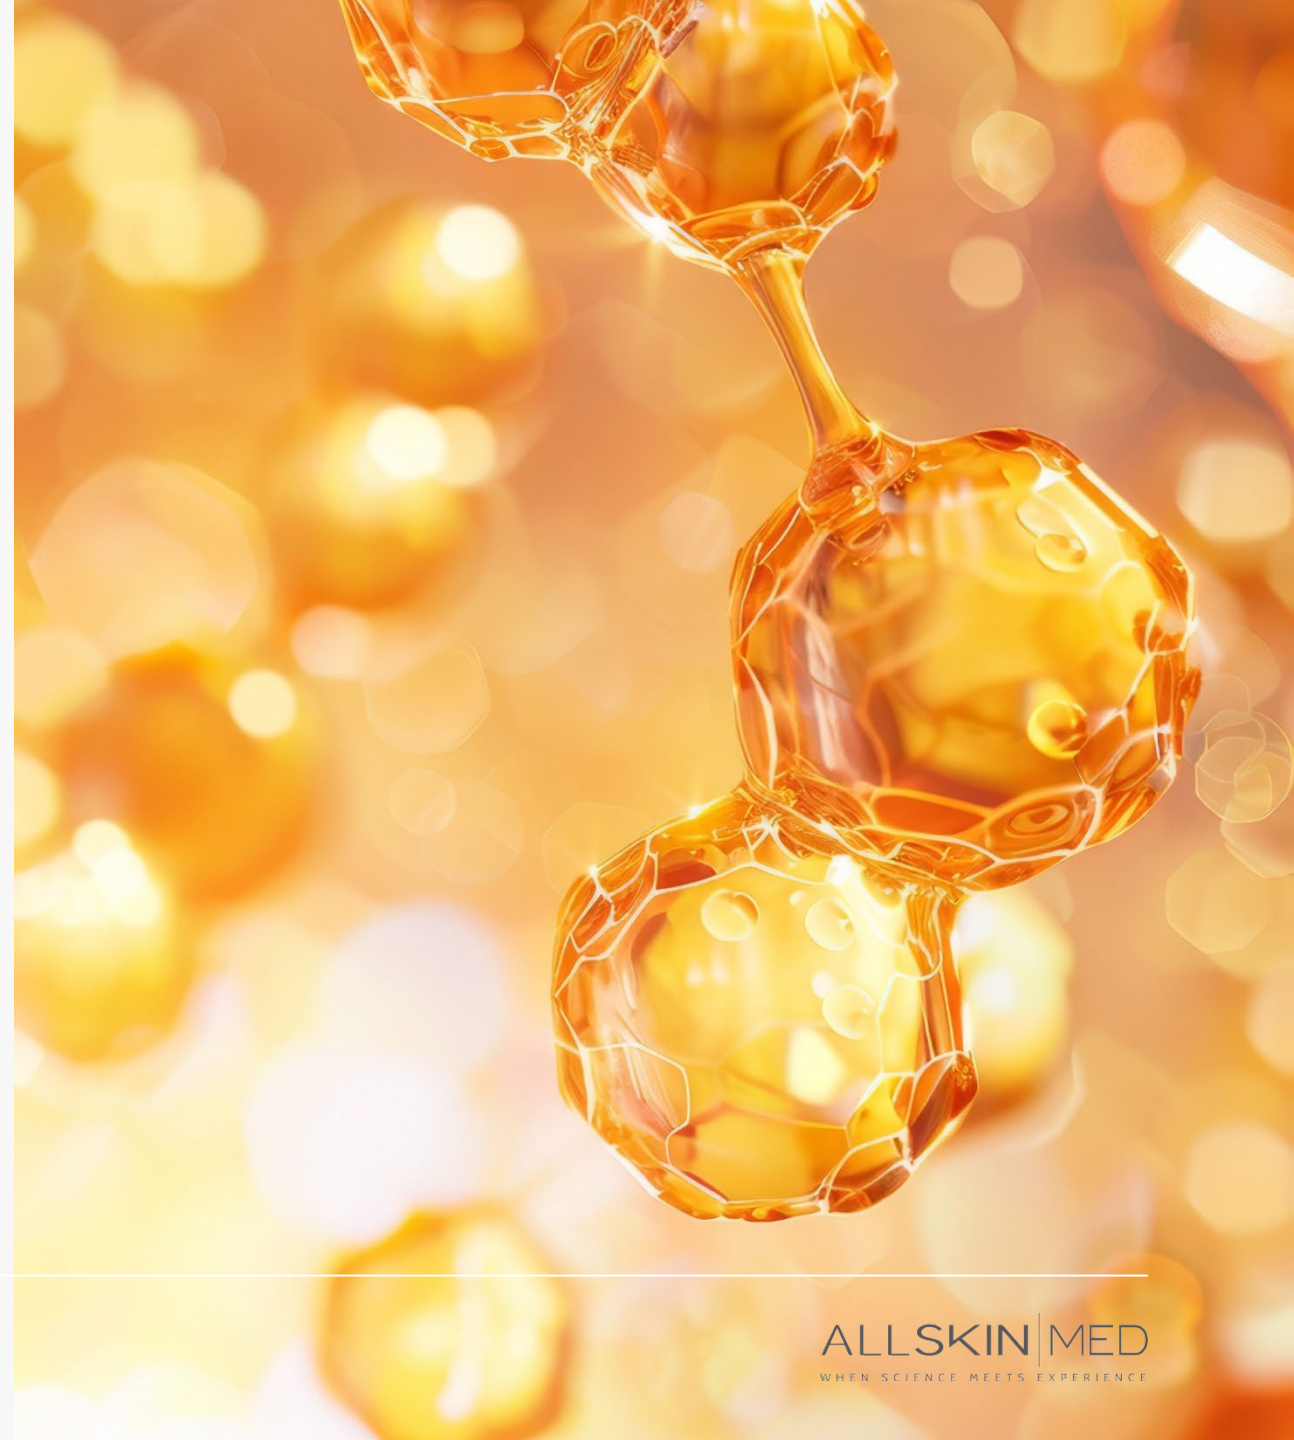

Depigmenting System

The advanced Depigmenting System is expertly formulated with a powerful blend of brightening tyrosinase inhibitors, niacinamide, kojic acid, and N-acetyl glucosamine, which work together to target every stage of the skin's melanin production cycle. It is clinically proven to promote a clearer, more even complexion, with a visible reduction in dark spots and discolouration

This system works by:

- Slowing down the production of melanin – the pigment responsible for dark spots
- Blocking key enzymes involved in creating pigmentation
- Preventing pigment from being transferred to the skin's surface
- Helping fade existing discolouration while preventing new patches from forming

By tackling pigmentation from multiple angles, this technology offers a comprehensive and clinically backed approach to achieving brighter, more even-toned skin.

Fernblock® Technology

- Fernblock® is a patented unique natural blend of polyphenols with antioxidant activity
- Standardized extract from the fern *Polypodium Leucotomos*
- The fern developed a natural, protective mechanism against sun & light damage
- 30+ years of continuous R&D
- 170+ publications in leading international scientific & medical journals
- Protect against UVA | UVB | Visible light | Infrared-A | Blue Light^{1,2,6}

Wharton Gel Complex®

Advanced Growth Factor Technology for Scalp & Hair Regeneration. Wharton Gel Complex® (WGC®) is a patented, purified biomaterial developed through cutting-edge growth factor technology.

Designed to rejuvenate the scalp and hair follicle environment, WGC® leverages a powerful synergy of growth factors, stem cell activators, and sulfated glycosaminoglycan (GAG) to restore structure, stimulate growth, and combat hair loss.

This unique technology works to:

- Enhance hair strength, thickness, and density
- Rebuild the structural foundation of the follicle and scalp
- Promote longer-lasting growth cycles and reduced shedding
- Support a healthy scalp ecosystem for resilient, youthful hair

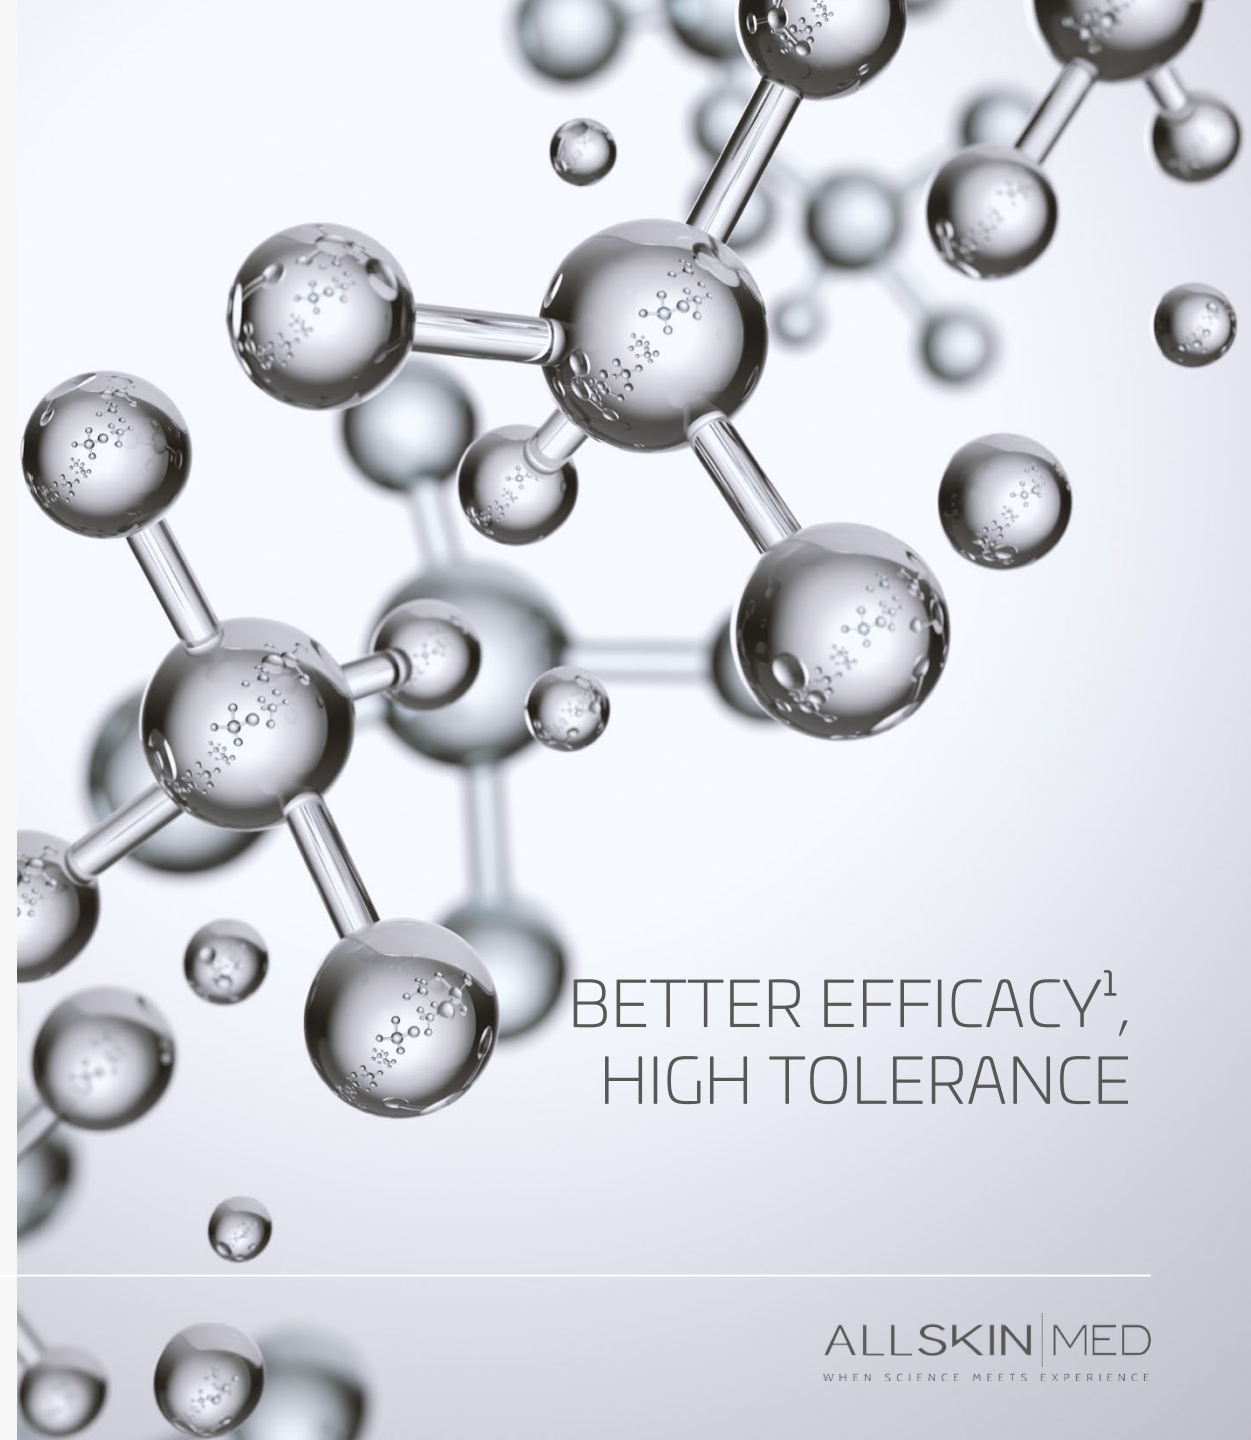

NEW RETINDUO® Exclusive Technology

Dual Technology – Triple Innovation

An exclusive dual-retinoid technology with triple technology: pure retinol in microsponges, retinal with AOX® Tech encapsulation and natural boosters to optimise bioavailability.

RETINDUO® uses the cosmetic retinoids with the highest levels of clinical evidence, delivered via advanced delivery mechanisms and supported by natural bioavailability-boosting ingredients. The result is an exclusive Cantabria Labs retinoid technology utilised at increasing levels of potency across the ALLSKIN | MED medical-grade retinoid range: formulated with advanced dermatological ingredients and tailored to medical aesthetic needs, including indications, skin sensitivity, and retinoid tolerance.

BETTER EFFICACY¹,
HIGH TOLERANCE

NEW RETINDUO® Exclusive Technology

Dual Technology – Triple Innovation

Pure Retinol

Microsponge encapsulation for long-lasting effect

Up to 0.3%

Retinal

Cantabria Labs exclusive technology: AOX®-Tech encapsulation for immediate and controlled effect. Caling, hydrating & skin barrier function repair activities.

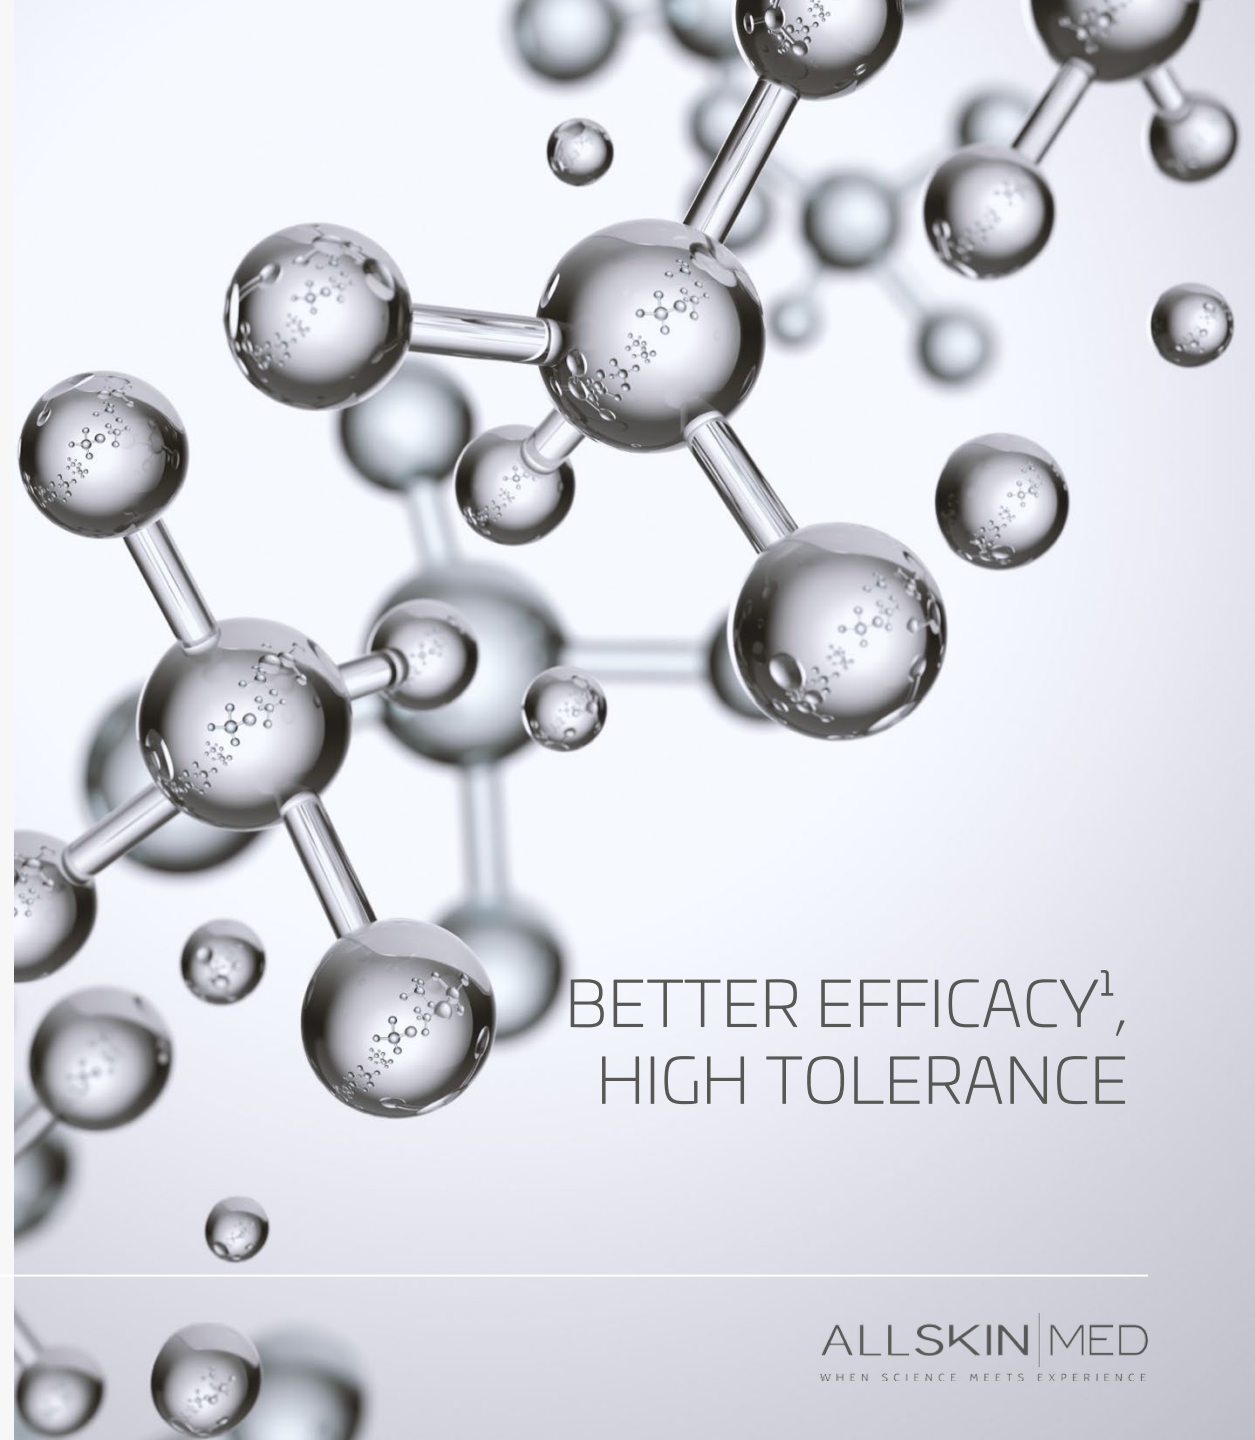

Up to 0.1%

Natural Boosters

AOX®-TECH

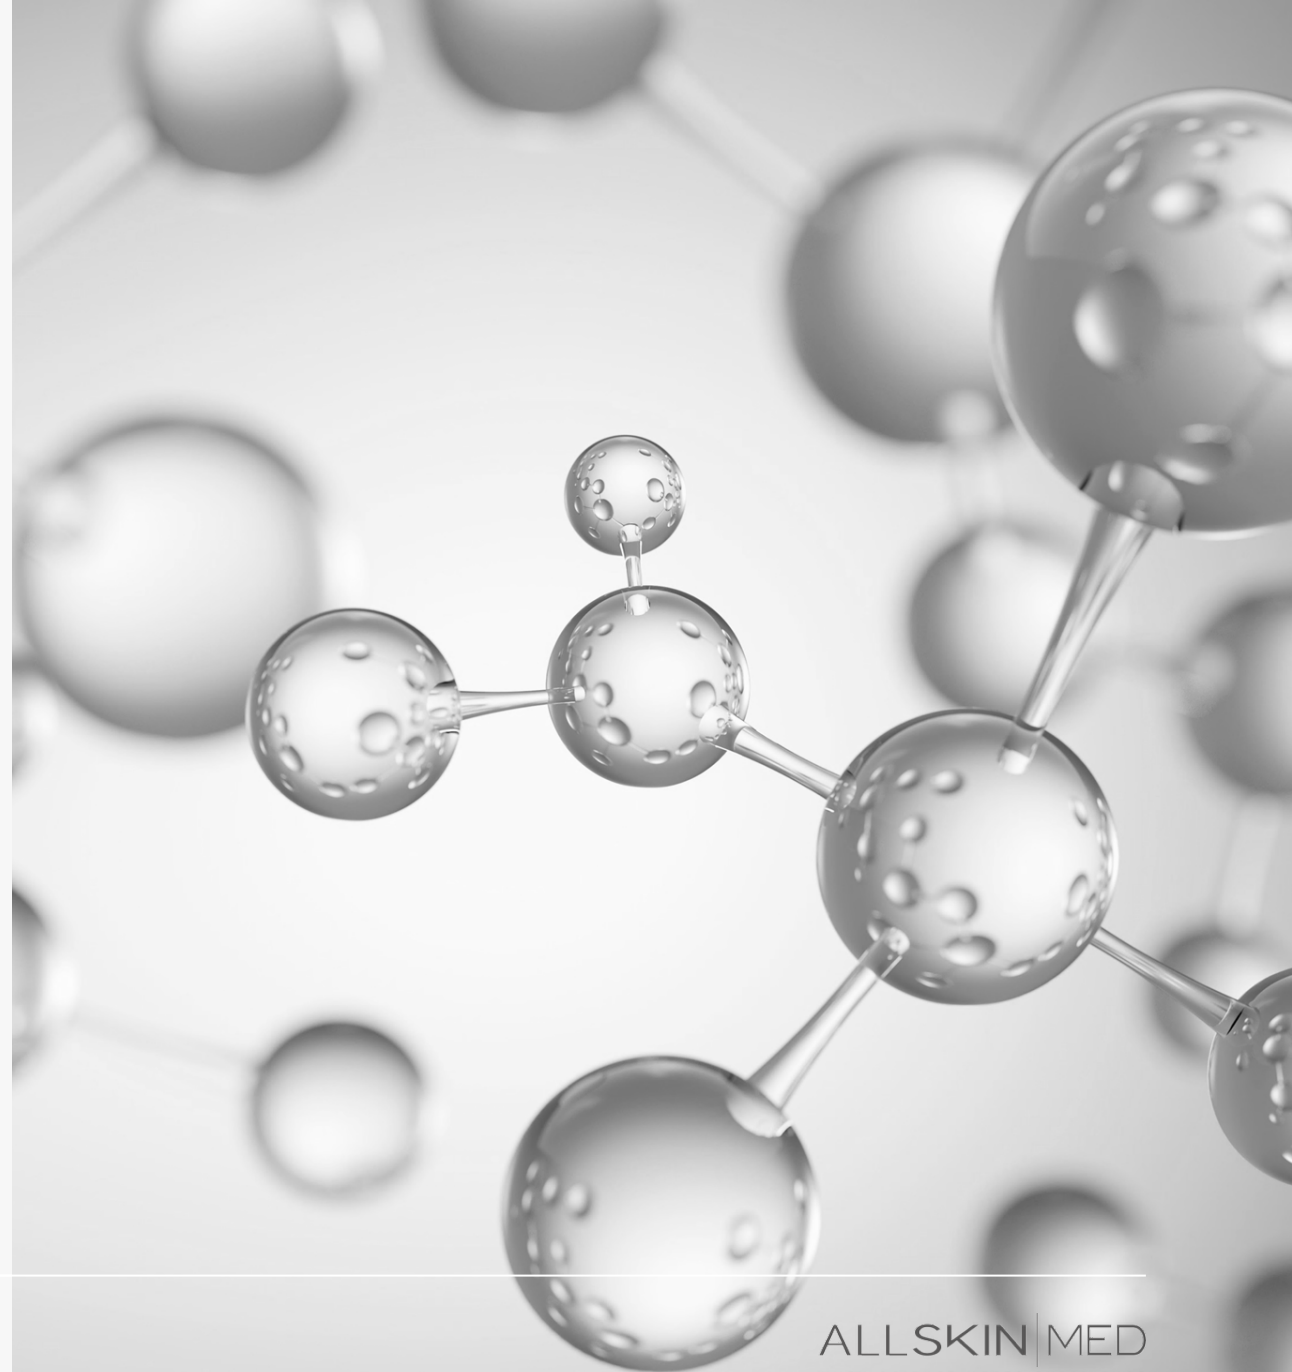

Natural
Booster

Dual Technology – Triple Innovation

Retinol

- ✓ The purest retinol on the market– 50C
- ✓ Encapsulated in microsponges
- ✓ Capable of creating a reservoir in the skin
- ✓ LONG LASTING effect
- ✓ Retinol-release system

Scientific Committee on Consumer Safety (SCCS). (2022, 26 de octubre). Revision of the Scientific Opinion (SCCS/1576/16) on Vitamin A (Retinol, Retinyl Acetate, Retinyl Palmitate). Dirección-General de Salud y Seguridad Alimentaria, Comisión Europea

Retinal

Encapsulated in AOX® -TECH encapsulation –
Exclusive technology from Cantabria Labs:

- ✓ Increases stability
- ✓ Ensures penetration
- ✓ Fast-acting effect

Booster

EFFICACY

- ✓ Prevents hydroxylation of Retinoic Acid
- ✓ Maximizes binding to RXR and RAR receptors – enhancing RA activity

TOLERANCE

- ✓ Anti-inflammatory capacity
- ✓ Effect on mediators responsible for inflammation

McCaffery, P., & Drager, U. C. (2000). Metabolism of vitamin A and its active metabolite all-trans-retinoic acid in small intestinal enterocytes. *Journal of Pharmacology and Experimental Therapeutics*, 295(3), 979–985. <https://doi.org/10.1152/jpet.00011.2006>

Wang, F., Kwak, H. S. R., Elbuluk, N., Kaczmarek, A. L., Hamilton, T., Voorhees, J. J., Fisher, G. J., & Kang, S. (2009). Retinoic acid 4-hydroxylase inducibility and clinical response to isotretinoin in patients with acne. *Journal of the American Academy of Dermatology*, 61(2), 252–258. <https://doi.org/10.1016/j.jaad.2009.03.013>

Booster

Plant derived natural booster that prevents the hydroxylation of retinoic acid (where the body rapidly deactivates retinoic acid), meaning:

- More active retinoic acid remains available
- Increased binding to RAR and RXR receptors
- Greater retinoid efficacy

This allows lower concentrations of retinol and retinal to deliver results equivalent to higher retinol percentages, while improving skin tolerance.

McCaffery, P., & Drager, U. C. (2000). Metabolism of vitamin A and its active metabolite all-trans-retinoic acid in small intestinal enterocytes. *Journal of Pharmacology and Experimental Therapeutics*, 295(3), 979–985. <https://doi.org/10.1152/jpet.00011.2006>

ALLSKIN | MED Retinoid Portfolio

Hyperpigmentation

Pigment Control Emulsion

Hyperpigmentation: dark spots, melasma. Lack of radiance and tone. Signs of ageing.

- Skin Cell Renewal: RETINDUO® Technology - Retinoid Potency 1, 2, 3
- Pigment-correction Complex: Tranexmic Acid & Niacinamide Complex
- Barrier Protective System: Reoxderm®
- Moisturising Repair System

Texture Imperfections

Texture Repair Emulsion

Texture damage, enlarged pores, acne-prone skin. Signs of ageing.

- Skin Cell Renewal: RETINDUO® Technology - Retinoid Potency 2
- Barrier Protective System: Reoxderm®
- Moisturising and Soothing Complex

Photoageing

Renewal Serum

Signs of ageing and skin damage: wrinkles, dull complexion and loss of firmness.

- Skin Cell Renewal: RETINDUO® Technology Retinoid Potency 1, 2
- Anti-pollution: EDAFENCE®
- Barrier Protection: Niacinamide Complex

Pigment Control Emulsion

CORRECTION & STABILISATION

An innovative anti-ageing and pigmentation-correcting range featuring RETINDUO® technology and a clinically proven depigmenting complex of Tranexamic Acid and Niacinamide, designed for the treatment of hyperpigmentation, including melasma, while addressing visible signs of skin ageing.

Key Ingredients

- Skin Cell Renewal: RETINDUO® Technology - Retinoid Potency 1,2,3 *Dual Technology – Triple Innovation*
 - Pure Retinol – microsphere encapsulation for long-lasting effect
 - Retinal – AOX®-TECH encapsulation for immediate and controlled effect
 - Natural Boosters – Plant derived booster to optimise bioavailability and enhance retinoid activity within the skin
- Pigment-Correction Complex
 - Tranexamic Acid & Niacinamide Complex Helps reduce the appearance of hyperpigmentation, including dark spots and melasma
 - Barrier Protective System: Rexoderm® Supports the skin barrier and helps optimise skin tolerability during retinoid use.
 - Moisturising Repair System Camelina Oil, Calendula Officinalis Flower Extract, Bisabolol, Glycerin and Pentylene Glycol help soothe the skin and maintain hydration.

SRP: Mild £110 | Medium £125 | High £132

Claims

- ✓ MORE RADIANT & LUMINOUS SKIN 90%²
- ✓ MORE EVEN SKIN TONE & TEXTURE 95%³
- ✓ SMOOTHER SKIN 90%²
- ✓ FIRMER SKIN 90%³

1.Compared to 0.5% Retinol in wrinkle amplitude and viscoelasticity. Texture Repair Emulsion

STIMULATION

A lightweight emulsion for all skin types including oily, combination and acne-prone skin with RETINDUO® technology to address signs of ageing and textural problems including enlarged pores. Supported by Reoxderm® Antioxidant technology and an advanced moisturising complex to optimise tolerability and skin hydration, while helping improve overall skin tone and radiance.

The perfect partner to professional resurfacing treatments.

Key Ingredients

- **Skin Cell Renewal:**
RETINDUO® Technology - Retinoid Potency 2
Dual Technology – Triple Innovation
 - Pure Retinol – microsphere encapsulation for long-lasting effect
 - Retinal – AOX®-Tech encapsulation for immediate and controlled effect
 - Natural Boosters – plant derived booster to optimise bioavailability and enhance retinoid activity within the skin
- **Barrier Protective System: Rexoderm®**
Supports the skin barrier and helps optimise skin tolerability during retinoid use.
- **Moisturising Repair System**
Helps maintain skin hydration and comfort, supporting tolerability for oily, combination and acne-prone skin.

SRP: £130

Renewal Serums

STIMULATION

A silky serum featuring RETINDUO® technology to support epidermal renewal and address signs of ageing and skin damage including wrinkles, dull complexion and loss of firmness. Essential is suited to early signs of ageing and those new to medical-grade retinoids or with sensitive skin, while Advanced is designed for retinoid-acclimatised skin and more advanced signs of ageing.

Key Ingredients

- Skin Cell Renewal:
RETINDUO® Technology - Retinoid Potency 1 & 2
Dual Technology – Triple Innovation
 - Pure Retinol – microsphere encapsulation for long-lasting effect
 - Retinal – AOX®-TECH encapsulation for immediate and controlled effect
 - Natural Boosters – Plant derived booster to optimise bioavailability and enhance retinoid activity within the skin
- Anti-Pollution Protection: EDAFENCE®
Helps protect the skin from environmental stressors and supports the prevention of photo-damage.
- Barrier Protective System Niacinamide Complex
Supports the skin barrier and helps improve skin tone and resilience
- Moisturising & Soothing Complex:
Bisabolol, Glyceric Acid, Vitamin C and Vitamin E
Help maintain skin hydration, soothe the skin and provide antioxidant protection.

SRP: Essential £110 | Advanced £115

These patented technologies and evidence-based ingredients are expertly combined into targeted formulation that work across all layers of the skin. ALLSKIN | MED's brand architecture was designed to deliver targeted solutions at every stage of the patient journey.

Preparation

Cleansing, exfoliation and activation to ensure that skin is ready for all treatments

Correction & Stabilisation

Active solutions that will help with your microbiome balance, aid in epidermal renewal, sebum regulation & pigment control while protecting your skin barrier function & brightening the complexion.

Stimulation

A wide range of products that help skin reach its full potential, with 2 main therapeutic objectives: cell and fibroblast activation

Protection

Formulas with broad spectrum sunscreen to protect all skin types from sun exposure, particularly post-treatment (including cosmetic and in-clinic procedures)

Hair Care

Hair & scalp are part of the skin. Skinification means achieving healthy hair with skincare ingredients. The exclusive Wharton Gel Complex® Technology stimulates hair growth and improves its quality

Preparation

Cleansing, exfoliation and activation to ensure that skin is ready for all treatments

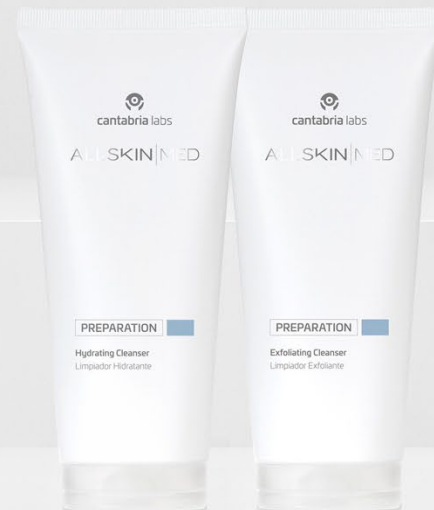

The Preparation Protocol

The Preparation Protocol is a three-step phase for optimal absorption of actives such as retinoids and AHAs, enhancing the results of in-clinic treatments including peels, microneedling, and laser procedures.

By refining the skin and balancing the pH, it supports skin tolerance, promotes smoother recovery, and creates a clean, balanced canvas that maximises performance of daily products and in-clinic treatments.

Step 1: Cleansing

Removes impurities, excess oil, and debris.

Step 2: Surface Exfoliation

Removes dead skin cells, refines texture and clears pores of superficial debris for an instantly smoother feel.

Step 3: Deeper Exfoliation & Rebalance

Resurface and refine the skin, unclog pores and control oil while rebalancing pH for a smoother, clearer, more radiant complexion.

Cleansers

Hydrating Cleanser

Dual action cleanser for normal to dry skin that cleanses and moisturizes the skin, minimising dryness and irritation of the most sensitive skins while exerting a regenerating effect.

Ingredients

- **Cleansing Actives:** Sodium Lauroyl Methyl Isethionate, Capryl Glucoside, Sodium methyl cocoyl
- Glycerin, Sodium Hyaluronate, Sodium PCA
- Panthenol: Soothing
- Allantoin: Anti-inflammatory

Benefits

- Cleanses and hydrates the skin
- Minimizes dryness and irritation
- Regenerates skin exposed to external aggressors and harsh treatments
- Soothes and softens the skin

Exfoliating Cleanser

Gentle exfoliating cleanser for normal to oily skin that acts on surface oiliness leaving the skin clean, but without drying it out.

Ingredients

- **Salicylic Acid in microbeads:** Chemical and physical exfoliant
- Vitamin E: Antioxidant
- Niacinamide: Anti-inflammatory

Benefits

- Removes excess oil and impurities.
- Eliminates dead skin cells and unclogs pores.
- Neutralises free radicals and soothes irritated skin.

Renewal Scrub

Benefits

- **Triple Exfoliation:** a triple-action exfoliant designed to prepare, refine and balance skin, enhancing its ability to absorb and optimise the benefits of subsequent treatments or procedures. This multi-mechanism approach is essential for effectively clearing dead cells, rebalancing sebum, and stimulating cell regeneration - optimising both skin condition and treatment efficacy. The renewal scrub helps correct textural imperfections on the skin. When studied, 100% of patients reported an improvement in skin texture.
- **Improved Skin Quality:** Reveals a healthier, more radiant complexion. By supporting collagen production and stimulating cellular renewal, it leaves the skin noticeable smoother, softer and revitalised.
- **Optimised Skin Preparation:** Conditions the skin prior to professional treatments, improving its receptivity and resilience to ensure optimal treatment performance and outcomes.
- **Antioxidant & Anti-Ageing Action:** Antioxidants help to balance sebum production and reduce surface oiliness, while hyaluronic acid enhances plumpness, elasticity, and barrier integrity, promoting stronger, more resilient skin ahead of treatment.
- **Suitable for All Skin Types:** Effective formulation for all skin types, including problematic, acne prone skin & dry skin.

Renewal Pads

Benefits

- **Sebum regulation:** Restores the skin's pH balance and helps regulate excess sebum production – a key cause of inflammation. This not only reduces surface oil, but also removes pore-clogging debris that can lead to problematic skin and acne
- **Keratolytic & cell renewal:** Promotes gentle exfoliation to correct textural imperfections and encourage smoother, more even, renewed skin
- **Triple Exfoliation:** A synergistic blend of physical, chemical, and enzymatic exfoliants targets every layer of surface buildup for superior skin renewal. This multi-mechanism approach is essential for effectively clearing dead cells, rebalancing sebum, and stimulating cell regeneration - optimising both skin condition and treatment efficacy.
- **Improved Skin Quality:** Enhances overall skin tone and texture while helping to control pigmentation for a clearer, more uniform complexion
- **Hydrating:** Provides balanced hydration for all skin types - including oily skin. By maintaining optimal moisture levels, it helps regulate sebum production
- **Optimised Skin Preparation:** Conditions the skin prior to professional treatments, improving its receptivity and resilience to ensure optimal treatment performance and outcomes.

Correction & Stabilisation

Active solutions that will help with your microbiome balance, aid in epidermal renewal, sebum regulation & pigment control while protecting your skin barrier function & brightening the complexion.

CORRECTION & STABILISATION

Barrier Defence Emulsion

Barrier Defence Emulsion is a daily barrier-boosting formula that activates the skin's natural healing and defense processes through powerful antioxidant technology, Reoxderm®. The emulsion supports against early signs of aging.

Key Ingredients

- Anti-inflammatory: Reoxderm®
- Active Defence Anti-Aging System: <0.1% retinol, Tri-Peptide Syn-Coll
- Moisture Repair System: Natural Plant Derived Emollients - Calendula, Almond oil, Sunflower oil, Camellia oil
- Anti-ox complex: Niacinamide, ascorbic acid (Vitamin C), Vitamin E, Turmeric, Lycopene

SRP: £88.50

Barrier Recovery Cream

Barrier Recovery Cream recovers and restores the skin barrier function with its antioxidant rich technology, Reoxderm®. The formula helps to hydrate and restore moisture and rebalance its microbiome. Soothes and calms sensitive skin instantly.

Key Ingredients

- Anti-inflammatory: Reoxderm®
- Active Repairing & Protective System: Reoxderm®, Plant Extracts
- Moisture Repair System: Calendula, Almond oil, Sunflower oil, Camellia oil
- Anti-ox complex: Ascorbic acid (Vitamin C), Vitamin E, Turmeric, Lycopene
- Microbiome balancing: Alpha-Glucan Oligosaccharide (prebiotic), Lactobacillus (probiotic)

SRP: £90.50

CORRECTION & STABILISATION

Retexturising Serum

A retexturising serum with a high concentration of glycolic, citric and shikimic acids which are delivered with a gradual release. Its additional skin hydrators and soothers mean maximum exfoliation with minimal irritation.

Key Ingredients

- Exfoliators: Glycolic, citric, lactic acid cocktail & Shikimic acid
- Skin hydrators
- Skin soother: Niacinamide
- Anti-ox complex: Vitamins A, C & E

SRP: £88.50

CORRECTION & STABILISATION

Pigment Control Serum

A beautiful, triple action serum that exfoliates to renew and brighten the skin. Its lightening complex targets each stage of melanin production and transfer, plus skin hydrators soften the skin.

Key Ingredients

- Skin Cell Renewal: RetinsSphere® Technology
- Pigmentation suppressors: Kojic Acid and N-Acetylglucosamine
- Skin brightener: Niacinamide
- Exfoliator: Salicylic acid, Skin hydrators

SRP: £80.00

Pigment Control Oral Capsules

A supplement with antioxidant properties and anti-ageing benefits that promotes the prevention and correction of pigmentation related to sun exposure.

Key Ingredients

- Photoprotective and anti-ageing: Fernblock®
- Depigmenting Agents: Niacinamide and Cystine
- Anti-ox complex: Vitamin C and Pomegranate Extract

SRP: £50.00

CORRECTION & STABILISATION

Brightening Ampoules

A high intensity oil-free serum that infuses the skin with high levels of Vitamin C to brighten and purify the complexion while SCA® PRO smooths lines and wrinkles. This 28-day course will awaken your skin and give it a rejuvenating boost.

Key Ingredients

- Intensive brightening and antioxidant activity: 15% Vitamin C
- Regenerating and repairing: 20% SCA® PRO growth factors
- Intensive moisturisation: Proteoglycans

SRP: £88.50

Clinical efficacy after 28 days

- +80% Increased brightness
- +80% Improved texture
- +90% Firming effect
- +90% Increased moisture
- +75% Increased elasticity

Cosmetic observations after 28 days

- 80% Increased brightness
- 85% softer skin
- 75% Increased elasticity

Stimulation

A wide range of products that help skin reach its full potential, with 2 main therapeutic objectives: cell and fibroblast activation

Regenerating Ampoules

Benefits

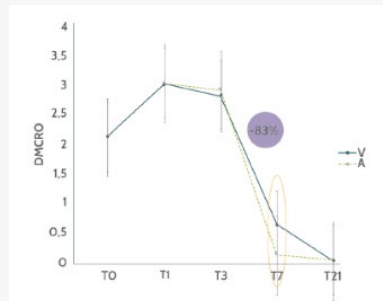

- **Clinically Proven Results:** Boosts treatment outcomes by up to 50%, significantly enhancing efficacy and improving overall patient satisfaction¹.
- **Advanced Regenerative Technology:** Powered by SCA® Pro, a clinically proven growth factor complex backed by 20+ scientific publications and over two decades of research.
- **In-Clinic Treatment Recovery:** Applied immediately post-procedure to soothe, calm, and repair skin at a cellular level, visibly reducing redness, burning, swelling, and discomfort within 24 hours².
- **Pre-Procedure & At-home Protocols:** When used as part of the Collagen Activation plan, they prime and strengthen the skin barrier ahead of treatments, activating regenerative pathways, and continuing to support recovery and regeneration at home to extend in-clinic results.
- **Collagen-Activating Results:** Stimulates fibroblast activity and promotes the production of collagen, elastin, and hyaluronic acid for firmer, more hydrated skin.
- **Visible Anti-Ageing Benefits:** Reduces transepidermal water loss (TEWL), restores hydration, and supports a stronger, healthier skin barrier.
- **Dermatologically Tested:** Safe, effective, and trusted, with clinical backing across both medical aesthetic practice and at-home care protocols.

1. Fernandez- Gonzalez P, Vitale M, Truchuelo MT. J. Cosmet. Derma.2. *50% improvement in avg. wrinkle reduction 28 days after fractional laser treatment, when treatment with post-treatment skincare was compared to treatment without post-treatment skincare.

SCA® PRO Clinical Data

Ablative CO2 Laser

Reduction in microcolumn density after ablative laser session. Significant percentages of decrease with SCA® treatment are shown. A: active; V: vehicle; T: time.

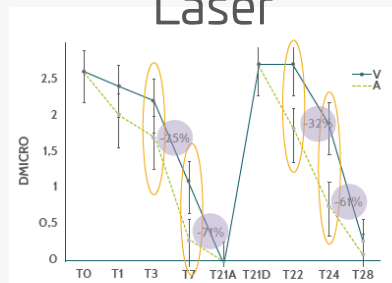

After 7 days, the average reduction in microcolumn density on the side treated with SCA® PRO was 83% greater than the side treated with vehicle

ANTIAGING PARAMETERS

Skin elasticity improved in both sides. The side treated with SCA® showed greater improvement in WRINKLE AREA vs vehicle.

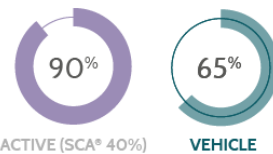

Non-ablative Laser

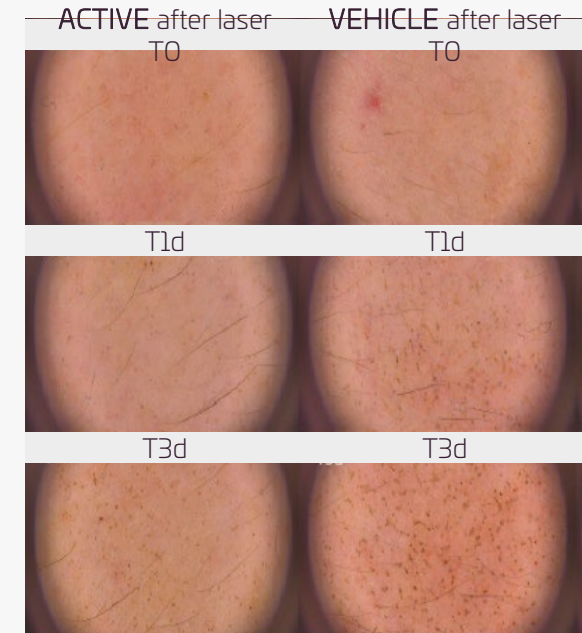

Recovery of density of microcolumns after laser in both hemifaces, faster with SCA®. Significant percentages of microcolumns density decrease after SCA® treatment. A: active; V: vehicle; T: time.

The density of microcolumns created by the laser decreased faster on the side treated with SCA® PRO vs. vehicle

Percentage of patients shown reduction in WRINKLE AREA

Both studies showed significantly fewer post-laser side effects on the side treated with SCA® PRO vs. vehicle in:

Erythema

Burning

Dryness

Image courtesy of Dr. Monica Kiripolsky

Clinically Proven Results

- ✓ SCA® PRO resulted in a significant reduction in downtime following ablative fractional laser procedure – showing a significant reduction in erythema and burning 24 hours following the procedure¹.
- ✓ SCA® PRO has shown to provide significant reduction in redness, burning and dryness 24 hours after a 25% TCA peel procedure².
- ✓ SCA® PRO is clinically proven to regenerate the skin through cell migration, proliferation and survival^{3,4}.
- ✓ Post-procedure, SCA® PRO has been clinically proven to enhance outcomes following both ablative and non-ablative treatments. After 28 days, patients demonstrated greater improvements in skin elasticity, with 90% also experiencing a visible reduction in wrinkles¹.

STIMULATION

Replenishing Cream

A rich, nourishing & soothing cream with powerful SCA® PRO growth factors to regenerate skin deep in the dermis, and a skin-firming complex with immediate and long-lasting hydrators

Key Ingredients

- Regenerating & repairing: SCA® PRO growth factors
- Antioxidant activity: Vitamin E
- Instant and long-lasting hydration: Moisturising active complex
- Firming: Calcium

SRP: £75.50

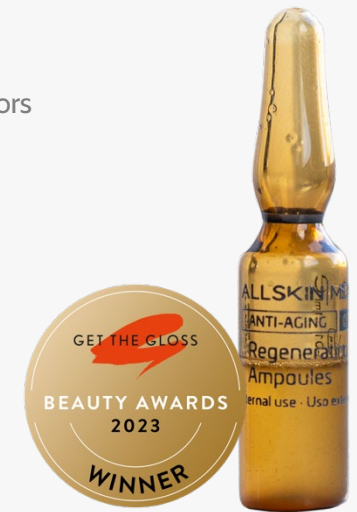

Regenerating Ampoules

A rich, rejuvenating serum to aid skin recovery, or to give your skin a month-long rejuvenating boost. With very high levels of SCA® PRO growth factors the serum gets to work deep within the dermis for outstanding results & reducing fine lines and increasing firmness.

Key Ingredients

- Regenerating & repairing: 40% SCA® PRO growth factors
- Antioxidant activity: Vitamins C & E
- Instant and long-lasting hydration: Moisturising active complex

SRP: £97.50

STIMULATION

Firming Serum

Working deep into the dermis with SCA® PRO growth factors, the light, fast-absorbing serum that repairs and regenerates the skin whilst boosting brightness, firmness and hydration.

Key Ingredients

- Regenerating & repairing: SCA® PRO growth factors
- Firming: Calcium & protein of soy
- Skin brightener: Niacinamide
- Antiox complex: Vitamins C & E
- Skin hydrators

SRP: £75.00

Regenerating Ampoules

A lightweight cream-gel that brightens and firms the skin around the eyes with potent SCA® PRO growth factor technology. Peptides help to reduce puffiness and dark circles, while soft-focus microspheres give instant luminosity and soften fine lines.

Key Ingredients

- Regenerating & repairing: SCA® PRO growth factors
- Firming: Decongestant peptides
- Reducing puffiness: Protein of soy
- Antioxidant Activity: Superoxide dismutase

SRP: £50.00

ALLSKIN | MED

Medical Grade Skincare Regimes:

AHA Step-Up Regime

Retinoid Renewal Step-Up Regime

Advanced Retinoid Renewal Regime

Retinoid Renewal Advanced Regime

For patients with more advanced signs of ageing and texture change who have already adapted to single-active protocols and require a combined AHA and retinol regime for maximal renewal & rejuvenation.

Recommended following a consultation and clinical skin assessment. To be used under practitioner guidance.

+ REGIME ENHANCEMENT PRODUCTS

ALLSKIN | MED Barrier Recovery Cream is a rich, restorative formula designed to accelerate skin recovery, restore barrier function, and deliver deep hydration. Powered by exclusive Reoxderm® antioxidant technology, it works at a cellular level to activate the skin's natural repair processes, reduce inflammation, and rebalance the microbiome. Instantly soothing sensitivity and calming irritation. Used as and when required.

ALLSKIN | MED Regenerating Ampoules are a medical-grade regenerative concentrate, formulated with a high concentration of SCA® Pro - a clinically proven growth factor complex. Designed to enhance skin regeneration, visibly reduce signs of ageing, and significantly accelerate skin recovery. Apply 1/2 an ampoule before Retexturing Serum.

ALLSKIN | MED Firming Eye Cream can be used to address fine lines and wrinkles, loss of firmness, dehydration and dull eye area.

*Practitioner-prescribed use: minimum three times weekly, increasing to a maximum of five times weekly under guidance.

Improve Skin Health – Improve Treatment Results and Recovery

Enhancing fibroblast proliferation and activity, including supporting the reactivation of senescent fibroblasts, before and during the treatment course can help improve the physiological impact of ablative and non-ablative rejuvenation and regenerative treatments, enhancing outcomes and supporting recovery.

Reinforcing the barrier can help manage the underlying skin inflammation and irritation helping manage the controlled dermal trauma of rejuvenation treatments, supporting the repair and recovery response.

Combining evidence-based, medical-grade skincare with advanced aesthetic procedures can help you achieve these goals.

ALLSKIN|MED can help improve skin health – Increased dermal fibroblast proliferation and activity in harmony with barrier reinforcement and repair – Improved treatment results and recovery.

Collagen Activation Barrier⁺ Plan

The ALLSKIN|MED unique technologies in medical-grade formulations:

SCA® PRO Growth Factor Technology: Targeted Dermal Rejuvenation

SCA® PRO is a patented, clinically proven technology derived from *Cryptomphalus aspersa* secretion and microencapsulated for targeted dermal delivery. Rich in proteins with growth factor-like activity, antioxidants and glycosaminoglycans, it promotes fibroblast proliferation and migration, stimulates collagen synthesis and supports extracellular matrix regeneration. By enhancing dermal remodelling and accelerating repair, SCA® PRO strengthens the regenerative response to advanced aesthetic procedures and contributes to improved firmness, elasticity and overall treatment outcomes.

Reoxderm® Advanced Antioxidant Technology: Barrier Reinforcement and Oxidative Defence

Reoxderm® is a patented antioxidant and immunomodulating technology formulated to regulate oxidative stress, modulate inflammatory response and support skin resilience. Through restoration of redox balance and acceleration of cellular repair mechanisms, it reduces ROS-induced damage and helps stabilise the skin during recovery. By strengthening the skin's capacity to repair and respond following controlled procedural injury, Reoxderm® enhances tolerance, reduces downtime and supports more predictable treatment outcomes.

Collagen Activation Barrier+ Plan

Clinically Proven Results:

Clinically proven treatment result enhancement by up to 50% and significantly accelerated skin recovery and downtime reduction.^{1,2}

Collagen Activation Plan

Hero Product

Collagen Activation Plan

2.

Positioning

The ALLSKIN | MED Collagen Activation Plan is a targeted, two-step dermal regeneration protocol designed to optimise and enhance the results of medical aesthetic treatments. Clinically proven to improve treatment outcomes by up to 50%, the plan works to activate collagen and support the skin's natural ability to regenerate itself, helping to reduce visible signs of aging. Featuring the powerful growth factor technology, SCA® Pro, it is delivered through two synergistic products: the Regenerating Ampoules and the Replenishing Cream. Developed for at-home use, this plan supports the skin through two phases of the treatment journey, from preparation to recovery, making it an essential adjuvant regime for patients undergoing both ablative and non-ablative procedures.

Indications:

- Stimulates cellular activity and initiates collagen production, preparing the skin to be more receptive and responsive to aesthetic procedures.
- The plan supports post-procedure recovery by enhancing regeneration. The plan has been proven to support faster recovery, reduce downtime, and deliver visible improvements in overall skin quality.

Ideal for:

- Patients with signs of advanced ageing, loss of firmness and elasticity.
- Patients seeking to optimise collagen production & skin regeneration.
- Skin recovering from professional aesthetic procedures
- Patients seeking to enhance the regenerative results of medical aesthetic treatments.

Clinically Proven Results

- ✓ The ALLSKIN | MED Collagen Activation Plan is clinically proven to enhance treatment results by up to 50%¹
- ✓ After 28 days, patients using the Collagen Activation Plan demonstrated greater improvements in skin elasticity, with 90% also experiencing a visible reduction in wrinkles¹.
- ✓ SCA[®] PRO resulted in a significant reduction in downtime following a 25% TCA peel procedure – showing a significant reduction in erythema and burning 24 hours following the procedure¹.
- ✓ SCA[®] PRO is clinically proven to regenerate the skin through cell migration, proliferation and survival^{3,4}.

Shirley Ballas

ALLSKIN | MED and Neogen

NEO
GEN

“We used the ALLSKIN | MED Regenerating Ampoules on Shirley straight after her NeoGen treatment and continued them at home to boost her results. Packed with powerful patented growth-factor technology, these ampoules help calm redness, speed up skin recovery, and stimulate collagen and elastin. I was thrilled to be the practitioner carrying out Shirley’s treatments, these ampoules are my go-to for enhancing results and ensuring post-treatment healing!”

Pigment Control Plan

Pigment Control Plan

2.

Positioning

The ALLSKIN | MED Pigment Control Plan is a clinically proven home-care protocol that delivers a comprehensive Prepare, Manage, Maintain approach to pigmentation management. Combining topical tyrosinase inhibitors, oral antioxidant and anti-inflammatory supplementation, and advanced photoprotection, the plan corrects existing hyperpigmentation, helps prevent recurrence, and improves overall skin clarity, tone, and radiance.

Supported by robust clinical evidence, the plan significantly enhances in-clinic depigmenting treatments, improving outcomes by up to 51% while reducing downtime and the risk of post-inflammatory hyperpigmentation (PIH). It also delivers strong standalone efficacy, achieving up to a 42% reduction in pigmentation, making it an effective, well-tolerated solution for patients unable to undergo or tolerate more aggressive protocols.

Indications:

- To prepare the skin for professional skin treatments and manage the risk of PIH, patients should begin the Pigment Control Plan 4 weeks prior and will begin to see results prior to treatment with product only.
- The plan can be used as an adjuvant to in-clinic treatments such as hydroquinone therapy, laser and IPL procedures, and chemical peels to deliver faster and better results compared to treatment alone. To manage the risk of PIH, continued use through-out the treatment course is recommended. To maintain treatment results, continue the use of the plan once treatment have ended.

Ideal for:

- Patients with Hyperpigmentation, including Melasma and sun damage.
- Patients at high-risk of post-inflammatory hyperpigmentation (PIH)
- Patients who want to enhance clinical treatment outcomes of hyperpigmentation
- Patients who require ongoing pigmentation management and skin brightening at home

Pigment Control Plan

Benefits

- **Comprehensive Pigmentation Management:** Delivers a structured Prepare, Manage, Maintain approach combining topical tyrosinase inhibitors, oral antioxidant and anti-inflammatory supplementation, and advanced photoprotection.
- **Clinically Proven Efficacy:** Demonstrated to enhance melasma treatment results by up to 51% when combined with in-clinic depigmenting treatments, delivering quicker, more visible improvements with reduced downtime and greater tolerability.
- **Effective Standalone Results:** Provides up to a 42% reduction in pigmentation even when used alone, making it a safe, non-invasive alternative for patients unable to tolerate harsh depigmenting protocols.
- **Targeted Pigmentation Correction:** Corrects existing hyperpigmentation and helps prevent recurrence, addressing chronic and recurrent conditions such as melasma.
- **Risk Management for PIH:** Reduces the likelihood of post-inflammatory hyperpigmentation, particularly valuable for higher-risk patients, or undergoing inflammatory/energy-based procedures.
- **Improved Skin Quality:** Enhances overall tone, brightness, and radiance while supporting a smoother, more even complexion.
- **Better Tolerability:** Minimises the need for aggressive, prolonged treatments by offering a safer, lower-risk, and well-tolerated solution for long-term pigmentation management.

Clinically Proven Results

- ✓ Reduces Melasma by up to 42% with products alone¹
- ✓ Enhances the efficacy of melasma treatments by 51% when used alongside clinical procedures²
- ✓ Delivers faster and superior improvements in skin brightness within 30 days, compared to clinical treatment alone³

Day 66

Targeted Approach:

This protocol delivered impressive rapid results without causing sensitivity.

Patient Feedback

Debrah attended clinic with no makeup which is the first time she has left the house without makeup in 20 years! Her confidence and happiness were immediately apparent.

HYPERPIGMENTATION

Protection

Formulas with broad spectrum sunscreen to protect all skin types from sun exposure, particularly post-treatment (including cosmetic and in-clinic procedures)

PROTECTION

Mineral Fluid SPF50

High-level, broad-spectrum sun protection product with 100% mineral filters. This silky fluid protects against the daily damage caused by UV, visible light and infrared-A. Enriched with the powerful antioxidant Fernblock.

Key Ingredients

- UVA & UVB protection: Mineral filters
- Infrared-A and visible light protection: Physavie, Biomimetic Melanin and OTZ, 10 Pro Taurine
- Powerful antioxidant activity, DNA repair, protection from infrared-A and visible light: Fernblock

SRP: £45.00

Regenerating Ampoules

High-level, broad-spectrum protection against daylight (UV, visible light and infrared-A) combined with natural-looking foundation coverage available in beige and bronze.

Key Ingredients

- UVA & UVB protection: Mineral filters
- Protection from infrared-A & visible light: Fernblock
- DNA repair: Glycosylase
- Hydration: Hyaluronic Acid

SRP: £45.00

ALLSKIN|MED PRESCRIPTIVE MEDICAL GRADE SKINCARE REGIMES

The Preparation Protocol

The Preparation Protocol is a three-step phase designed to prepare the skin for optimal absorption of active ingredients such as retinoid and AHAs, while enhancing the results of in-clinic treatments including peels, microdermabrasion, and laser procedures. By refining the skin and balancing the skin's pH prior to treatment, it supports skin tolerance, promotes smoother recovery, and creates a clean, balanced canvas that maximises the performance of both daily products and professional in-clinic treatments.

- Improves skin texture
- Balances pH in preparation for use of active ingredients
- Controls sebum production
- Maintains barrier function & hydration
- Stimulates cell renewal
- Gently but effectively exfoliates
- Prepares skin for in-clinic treatments
- Calms and soothes (soothes)
- Evens tone and reduces hyperpigmentation
- Boosts radiance

ALLSKIN|MED PRESCRIPTIVE MEDICAL GRADE SKINCARE REGIMES

Retinoid Renewal Step-Up Regime

For patients beginning or intensifying a retinoid-based regime, with early to moderate photodamage who need smoother texture, refined lines and a more even skin tone.

Recommended following a consultation and clinical skin assessment. See the user/doctor practitioner guidance.
